Lavoro di Maria Valenti a.s. 2012-13, vedi qui:

<https://blogscuol.wordpress.com/2012/12/30/maggiore-minore-uguale/>

L'idea del gioco l'ho trovato su una raccolta del [Nucleo di ricerca di Rozzano](#) (Università di Pavia), modificato per la mia classe in "la battaglia delle fate" nel 2007 pubblicata su:

<https://lameladiodessa.wordpress.com/2010/03/29/la-battaglia-delle-fate/>

e modificata poi con la disposizione dei numeri in palline a cinque nel 2012.

Buon lavoro e buone partite!
